Canadian Technical Report of Hydrography and Ocean Sciences

Technical reports contain scientific and technical information that contributes to existing knowledge but which is not normally appropriate for primary literature. The subject matter is related generally to programs and interests of the Ocean Science and Surveys (OSS) sector of the Department of Fisheries and Oceans.

Technical reports may be cited as full publications. The correct citation appears above the abstract of each report. Each report is abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Technical reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out of stock reports will be supplied for a fee by commercial agents.

Regional and headquarters establishments of Ocean Science and Surveys ceased publication of their various report series as of December 1981. A complete listing of these publications is published in the *Canadian Journal of Fisheries and Aquatic Sciences*, Volume 39: Index to Publications 1982. The current series, which begins with report number 1, was initiated in January 1982.

Rapport technique canadien sur l'hydrographie et les sciences océaniques

Les rapports techniques contiennent des renseignements scientifiques et techniques qui constituent une contribution aux connaissances actuelles, mais qui ne sont pas normalement appropriés pour la publication dans un journal scientifique. Le sujet est généralement lié aux programmes et intérêts du service des Sciences et levés océaniques (SLO) du ministère des Pêches et des Océans.

Les rapports techniques peuvent être cités comme des publications complètes. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports techniques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les rapports techniques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

Les établissements des Sciences et levés océaniques dans les régions et à l'administration centrale ont cessé de publier leurs diverses séries de rapports en décembre 1981. Une liste complète de ces publications figure dans le volume 39, Index des publications 1982 du *Journal canadien des sciences halieutiques et aquatiques*. La série actuelle a commencé avec la publication du rapport numéro 1 en janvier 1982.

Nicholson, H.F., and J.E. Moore. 1988. Bibliography on the limnology and fisheries of Canadian freshwaters. No. 10 (Final cumulative edition). Vol. 1 (of 3). Author Index. Can. Tech. Rep. Fish. Aquat. Sci., 1600 (Vol.1): v+315p.

ABSTRACT

Nicholson, H.F., and J.E. Moore. 1988. Bibliography on the limnology and fisheries of Canadian freshwaters. No. 10 (Final cumulative edition). Vol. 1 (of 3). Author Index. Can. Tech. Rep. Fish. Aquat. Sci., 1600 (Vol.1): v+315p.

This bibliography began in 1974 and has continued since that time. Parts 1-6 inclusive were published in the Technical Report Series, Parts 7-9 inclusive were unpublished. The present issue, No. 10, is the last of the series and is a cumulative one, containing in addition all the previous entries (series 1-9 inclusive). It is issued as a set of three volumes i.e., Volume 1 - Author Index, containing 9,000 references in alphabetical order of the initial author; Volume 2 - Numerical Index in which all the references are numbered and is used in conjunction with the next Volume; Volume 3 - Canadian Freshwater Features, covering the ten Provinces and two Territories, and the numbered references to which they refer, as given in Volume 2. The Great Lakes and connecting channels are not included.

The literature searches ceased in the spring of 1987 and covered not only the available current publications of the times, but also historical literature as far back as the early 19th century.

RÉSUMÉ

Nicholson, H.F., and J.E. Moore. 1988. Bibliography on the limnology and fisheries of Canadian freshwaters. No. 10 (Final cumulative edition). Vol. 1 (of 3). Author Index. Can. Tech. Rep. Fish. Aquat. Sci., 1600 (Vol.1): v+315p.

Cette bibliographie, commencée en 1974, a continué depuis. Les parties 1 à 6 inclusivement ont été publiées dans la Série des Rapports techniques, les parties 7 à 9 inclusivement n'ont pas été publiés. La présente édition, le n° 10, constitue la dernière de la série; c'est une édition cumulative qui contient, en plus, toutes les entrées précédentes (série 1 à 9 inclusivement). Cette publication se présente en trois volumes : volume 1 - Index des auteurs, contenant 9 000 références classées selon l'ordre alphabétique des auteurs; volume 2 - Index numérique, dans lequel toutes les références sont numérotées et qui est utilisé conjointement avec le volume suivant; volume 3 - Caractéristiques des eaux douces canadiennes, couvrant les dix provinces et les deux territoires et les références numérotées auxquelles elles renvoient, telles qu'indiquées dans le volume 2. Les Grands Lacs et les canaux qui les relient ne sont pas inclus.

La recherche documentaire a cessé au printemps de 1987; elle a porté non seulement sur les publications actuelles disponibles, mais aussi sur les documents publiés aussi loin dans le passé que les débuts du 19^{e} siècle.

INTRODUCTION TO VOLUME 1

The references are entered in alphabetical order of the initial author. A bracketed positive sign (+) following the reference indicates that the paper has been seen but cannot be processed into the bibliography for various reasons,. e.g., no specific freshwater data given (mostly areal surveys only), feature names and locations unidentifiable, bibliographies, etc. A bracketed negative sign (-) indicates that a copy of the paper could not be obtained and might contain some relevant data. Thus, references followed by either of these signs are not included in Volume 3.

Canadian Technical Report of Hydrography and Ocean Sciences

Technical reports contain scientific and technical information that contributes to existing knowledge but which is not normally appropriate for primary literature. The subject matter is related generally to programs and interests of the Ocean Science and Surveys (OSS) sector of the Department of Fisheries and Oceans.

Technical reports may be cited as full publications. The correct citation appears above the abstract of each report. Each report is abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Technical reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out of stock reports will be supplied for a fee by commercial agents.

Regional and headquarters establishments of Ocean Science and Surveys ceased publication of their various report series as of December 1981. A complete listing of these publications is published in the *Canadian Journal of Fisheries and Aquatic Sciences*, Volume 39: Index to Publications 1982. The current series, which begins with report number 1, was initiated in January 1982.

Rapport technique canadien sur l'hydrographie et les sciences océaniques

Les rapports techniques contiennent des renseignements scientifiques et techniques qui constituent une contribution aux connaissances actuelles, mais qui ne sont pas normalement appropriés pour la publication dans un journal scientifique. Le sujet est généralement lié aux programmes et intérêts du service des Sciences et levés océaniques (SLO) du ministère des Pêches et des Océans.

Les rapports techniques peuvent être cités comme des publications complètes. Le titre exact parait au-dessus du résumé de chaque rapport. Les rapports techniques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les rapports techniques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

Les établissements des Sciences et levés océaniques dans les régions et à l'administration centrale ont cessé de publier leurs diverses séries de rapports en décembre 1981. Une liste complète de ces publications figure dans le volume 39, Index des publications 1982 du *Journal canadien des sciences halieutiques et aquatiques*. La série actuelle a commencé avec la publication du rapport numéro 1 en janvier 1982.

Nicholson, H.F., and J.E. Moore. 1988. Bibliography on the limnology and fisheries of Canadian freshwaters. No. 10 (Final cumulative edition). Vol. 2 (of 3). Numerical Index. Can. Tech. Rep. Fish. Aquat. Sci., 1600 (Vol.2): v+260p.

ABSTRACT

Nicholson, H.F., and J.E. Moore. 1988. Bibliography on the limnology and fisheries of Canadian freshwaters. No. 10 (Final cumulative edition). Vol. 2 (of 3). Numerical Index. Can. Tech. Rep. Fish. Aquat. Sci., 1600 (Vol.2): v+260p.

This bibliography began in 1974 and has continued since that time. Parts 1-6 inclusive were published in the Technical Report Series, Parts 7-9 inclusive were unpublished. The present issue, No. 10, is the last of the series and is a cumulative one, containing in addition all the previous entries (series 1-9 inclusive). It is issued as a set of three volumes i.e., Volume 1 - Author Index, containing 9,000 references in alphabetical order of the initial author; Volume 2 - Numerical Index in which all the references are numbered and is used in conjunction with the next Volume; Volume 3 - Canadian Freshwater Features, covering the ten Provinces and two Territories, and the numbered references to which they refer, as given in Volume 2. The Great Lakes and connecting channels are not included.

The literature searches ceased in the spring of 1987 and covered not only the available current publications of the times, but also historical literature as far back as the early 19th century.

RÉSUMÉ

Nicholson, H.F., and J.E. Moore. 1988. Bibliography on the limnology and fisheries of Canadian freshwaters. No. 10 (Final cumulative edition). Vol. 2 (of 3). Numerical Index. Can. Tech. Rep. Fish. Aquat. Sci., 1600 (Vol.2): v+260p.

Cette bibliographie, commencée en 1974, a continué depuis. Les parties 1 à 6 inclusivement ont été publiées dans la Série des Rapports techniques, les parties 7 à 9 inclusivement n'ont pas été publiés. La présente édition, le n° 10, constitue la dernière de la série; c'est une édition cumulative qui contient, en plus, toutes les entrées précédentes (série 1 à 9 inclusivement). Cette publication se présente en trois volumes : volume 1 - Index des auteurs, contenant 9 000 références classées selon l'ordre alphabétique des auteurs; volume 2 - Index numérique, dans lequel toutes les références sont numérotées et qui est utilisé conjointement avec le volume suivant; volume 3 - Caractéristiques des eaux douces canadiennes, couvrant les dix provinces et les deux territoires et les références numérotées auxquelles elles renvoient, telles qu'indiquées dans le volume 2. Les Grands Lacs et les canaux qui les relient ne sont pas inclus.

La recherche documentaire a cessé au printemps de 1987; elle a porté non seulement sur les publications actuelles disponibles, mais aussi sur les documents publiés aussi loin dans le passé que les débuts du 19^{e} siècle.
